

AIR CONDITIONERS

Rekord offers a wide selection of proven and reliable air conditioners from leading manufacturers, featuring high seasonal efficiency. These units are ideal for integration into larger cooling and heating systems. Connected to buildings via air supply ducts, they eliminate the need for additional internal components. Our extensive range of air conditioners is suitable for even the most demanding projects. The models available provide cooling capacities from 17 to 90 kW and heating capacities ranging from 16 to 89 kW.

- **Reliable Performance:** Our selection of products from top manufacturers deliver maximum efficiency.
- **Versatile Solutions:** These units are ideal for integrating into larger cooling and heating systems.
- **Easy Installation:** Seamless connection to structures through air supply ducts.
