

CHAMPION DOOR

The Champion Door is an ideal choice for aircraft hangars. It features a large partition-free doorway that can be outfitted with two layers of thermal and acoustic insulation. The Champion Door is specifically developed to withstand unpredictable and harsh weather conditions. With these doors, personnel can open the entire frame or just a designated section.

- **User Friendly, Modular Design:** Personnel can open the large, partition-free doorway fully or just a designated section.
- **Enhanced Durability:** Designed to withstand unpredictable and harsh weather conditions.
- **Custom Solutions:** May be fitted with windows, as well as two layers of thermal and acoustic protection. Optional anti-theft protection is also available.
