

SHOWER 14 SHOWER CONTAINER

The Shower 14 Container is an efficient and practical alternative to traditional portable shower cabins. This unit provides 14 independent shower stalls, each with individual access and integrated washbasins. It is equipped with a high performance heating and ventilation system for user comfort, as well as a non-slip floor for added safety. The container can be outfitted with power generators to ensure uninterrupted operation during a power outage.

- **Efficient Climate Control:** Equipped with a robust, high performance heating and ventilation system for optimal conditions.
- **Enhanced Safety:** A non-slip floor prioritizes safety and comfort.
- **Flexible Waste Management:** Can be connected to an external waste tank in locations without direct sewer access.
- **Reliable Power Supply:** Can be outfitted with power generators to ensure uninterrupted operation during power outages.
- We offer a waste removal and cleaning service for easy maintenance.
