

SHOWER 6 SHOWER CONTAINER

The Shower 6 Container is a practical and efficient alternative to portable shower cabins. This unit provides convenient access to six shower stalls, all accessible through a single main entrance. It is equipped with a high performance heating and ventilation system for user comfort, as well as a non-slip floor for added safety. The container can be outfitted with power generators to ensure uninterrupted operation during a power outage.

- **Efficient Climate Control:** Equipped with a robust, high performance heating and ventilation system for optimal conditions.
- **Enhanced Safety:** A non-slip floor prioritizes safety and comfort.
- **Flexible Waste Management:** Can be connected to an external waste tank in locations without direct sewer access.
- **Reliable Power Supply:** Can be outfitted with power generators to ensure uninterrupted operation during power outages.
- We offer a waste removal and cleaning service for easy maintenance.
